COMPANY PROFILE

SOLIDBASE 25

Building and civil contracting

Construction, refurbishment and maintenance

SOLIDBASE 25 (Pty) Ltd is a Cape Town-based contractor serving public and private clients. Our work covers civil infrastructure, building construction and the repair and upkeep of existing facilities.

SOLIDBASE 25 is led by Mzwabantu Mayekiso and Ipeleng Tau, who bring experience in civil works, construction and project management. They are supported by site teams with decades of hands-on experience in construction and maintenance.

Cape Town, South Africa

Civil and building works

We take on new construction, refurbishment and repairs, from groundwork through to the final finishes.

Civil works

Earthworks and pavement layers. Site clearance, excavation, bulk earthworks and construction of pavement layers, subbases and bases.

Roads and external infrastructure. Kerbs, edgings, asphalt, chip seal and concrete surfacing, walkways, road furniture and reinstatement.

Stormwater and sewer infrastructure. Pipe laying, manholes, catchpits, culverts, lined drains and upgrades to existing systems.

Structural concrete. Reinforced foundations, slabs and retaining walls, concrete channels and pavements.

Building works

Foundations and structural works. Setting out, strip and raft foundations, slabs, brickwork and blockwork, columns, beams and roof structures.

Roofing and waterproofing. Roof sheeting and covering repairs or replacement, with attention to flashings, junctions and weatherproofing.

Finishes and reinstatement. Plastering, skimming, painting, tiling, ceilings, partitions, carpentry, fittings and reinstatement after damage.

Plumbing and external works. Plumbing and building drainage, paving, boundary walls, fencing and reinstatement of disturbed areas.

In occupied buildings, we plan access, sequencing and protection around the people using the site.

Specialist services

We undertake these trade packages independently or as part of a wider construction or refurbishment scope.

Aluminium and glazing

Doors, windows and frames. Installation, repair and replacement of aluminium doors, windows and frames. We assess the opening, frame condition, alignment and hardware before work begins.

Glazing, seals and ironmongery. Replacement glazing, gaskets and seals, handles, hinges, locks, stays and other hardware. Repairs to existing steel windows include reglazing, reputtying and repainting as specified.

Road marking

New markings and remarking. Machine-applied line marking for roads, parking areas and paved sites. We set out the markings and agree the work sequence around site access and traffic.

Application and finish. Surface preparation to the agreed scope, application to specified widths and layouts, reflective media where required and checks before reopening.

Electrical services

Installations and upgrades, distribution boards, lighting, power circuits, fault finding and backup power solutions. We coordinate compliance inspections and certification through appropriately registered practitioners where required.

Property maintenance

Planned maintenance and repairs across buildings and infrastructure, including roofing, painting, glazing, doors, plumbing, drainage and paving. We assess the defect and agree the scope before repairs begin.

How we manage quality

We agree the standard of finish up front and carry out inspections at key stages, from setting out to handover.

01 **Confirm the scope**

Check existing conditions, verify dimensions on site and agree materials, finishes and safe access arrangements.

02 **Inspect as work proceeds**

Check workmanship at the stages that matter, including levels, fixings and concealed work before it is covered.

03 **Check function and finish**

Test operation where applicable, inspect the completed finish and close out snags before handover.

04 **Record and hand over**

Keep site records and photographs appropriate to the scope and provide agreed sign-offs and close-out information.
